

ZW15D15W-Z303

water disinfection UV lamp(single end 4 pins type)

①. Product characteristic

Special treatment on electrode and quartz tubes to make lifetime longer and improve UV light output. Usage two different lamp holders, match with quartz coating-tube of 20mm and 22mm inner diameters. High ozone lamps can produce hydroxyl in the water, dissolve organism, reduce TOC.

②. Application area

Purity water、 life-usage water、 ionized water、 medicinal water disinfection, the matched equipment for water treatment. Photo catalytic degradates organic matter in wastewater, applying to wastewater treatment.

Type	Lamp Tube Diameter (mm)	Length of lamp (mm)	Power (W)	Voltage at 50/60 (V)	Current (mA)	UV Output	Rated Life (H)
						($\mu\text{W}/\text{cm}^2$)
