  - 1.4 New Features and Functionality .....4

## 1 All LMS Virtual.Lab Workbenches

### 1.1 Installation & Licensing

LMS Virtual.Lab for Windows build uses Visual Studio 2005 for optimal performance. Applications that are built with Visual Studio 2005 require that the Microsoft Runtime C++ library is installed on the computer. The LMS Virtual.Lab installation program does this for you. However, if you would like to do a network based installation, you will have to deploy a Microsoft installation on each computer. You can download these packages from Microsoft at the following locations:

- 32 bit Windows:  
<http://www.microsoft.com/downloads/details.aspx?familyid=200b2fd9-ae1a-4a14-984d-389c36f85647&displaylang=en>
- 64 bit Windows:  
<http://www.microsoft.com/downloads/details.aspx?FamilyID=EB4EBE2D-33C0-4A47-9DD4-B9A6D7BD44DA&displaylang=de>

### 1.2 Status Bugs and Features

The status of bug reports and feature requests is updated weekly at <http://www.lmsintl.com/support/bugs>. This information is available to all LMS customers who have products under warranty or who have subscribed to a Software Support Policy contract.

One can complete a search using the following criteria available on the provided website link:

## Status Bugs and Features

Please fill out the form below to search for reported problems.

**Last Update: 24 Feb 2008.**

### Search Criteria :

Product Category :	<input type="text" value="LMS Virtual.Lab"/>
Product :	<input type="text" value="-- any --"/>
Reported in Revision :	<input type="text" value="-- any --"/>
Target/Planned Revision :	<input type="text" value="-- any --"/>
Service Request ID :	<input type="text"/>
Date Opened :	After <input type="text"/> 
	Up To <input type="text"/> 
Keyword :	<input type="text"/>

I want to search :

- All Problem Reports  
 Problem Reports for my Account  
 My personal Problem Reports

Upon completion of a search, a list is provided, which can be exported to Excel. The website list consists of a short description and the exported Excel list includes a full description of the search results.

### 1.3 Documentation

Updated help descriptions for various topics.

### 1.4 New Features and Functionality

LMS Virtual.Lab Service Level releases are focused on increased reliability and robustness. Therefore, this Service Level release Rev 7B SL1 only contains defect fixes. No new features or functionality were added.

We hope you will enjoy using this new version.
