

FEATURES

- High Vceo (60Volts)
- UL approval E196140
- Current Transfer Ratios (50% to 600% grade selectable)

GENERAL DESCRIPTION

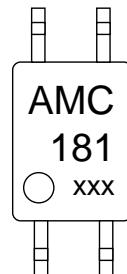

The AMC181 High Voltage Opto Coupler may be used in a variety of applications where high isolation is required between primary and secondary circuits. The Opto-Transistor side of the AMC181 is capable of withstanding Vce Voltages of up to 60Volts without sustaining damage to the device.

Designed for use in telecommunications and data communications equipment the AMC181 opto coupler is an ideal replacement for the industry standard TLP181 device, with matching characteristics.

The AMC181 fits inside the standard footprint for mini-flat opto couplers and may be used as a drop in replacement for designs

- High Isolation Voltage between LED and Opto Transistor (3750Volts)
- Mini-flat Surface mount Package

4-pin Mini-Flat Package

AMC181 Package outline

already using the Toshiba TLP181 component.

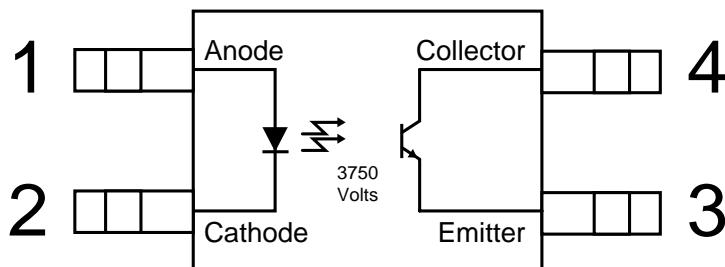

When sited in a line interface circuit behind an AMC127 as the main line seize component, the AMC181 device is ideal for switching telecommunications circuits from relatively low currents flowing in the LED.

The AMC181 device is packaged in a black, rather than the industry standard white housing, making the AMC181 device less sensitive to background ambient light levels.

As with all our devices, Alpha Micro Components offers full engineering support on designs using the AMC181.

APPLICATIONS

- Telephone sets
- Data modem line interface circuits.
- Photo-Copiers
- Fax machines
- Switched mode power supply control
- Linear power supply control / sensing
- High density surface mount systems
- Ideal for use in the Alpha Micro Components "High sensitivity" line-in-use voltage detection circuit.

DC, ac, & Isolation Characteristics

• Absolute Maximum Ratings

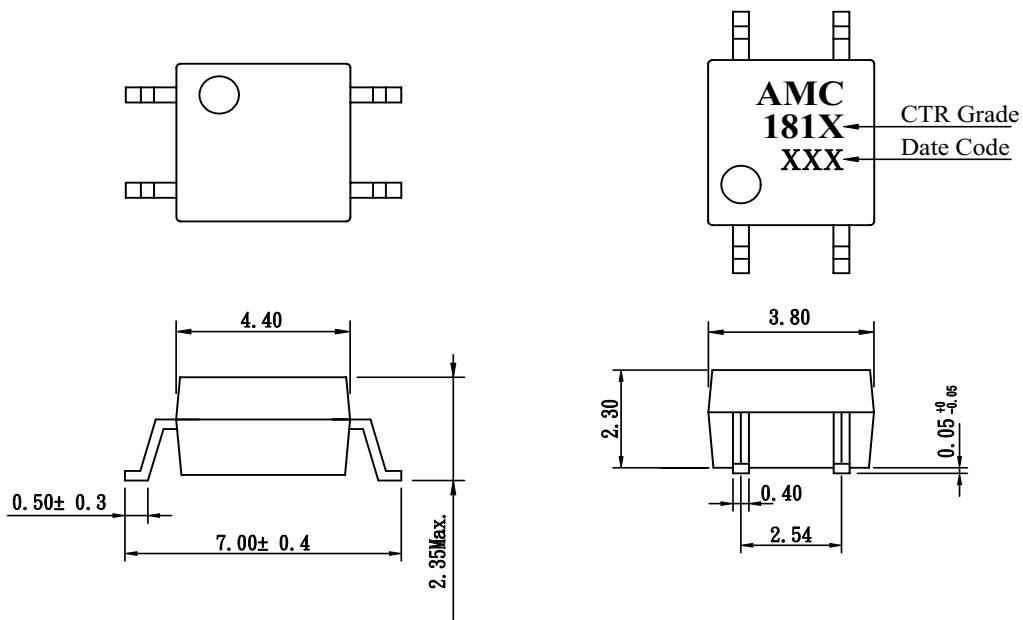

(Ta = 25 °C)

Parameter		Symbol	Rating	Unit
Input	Forward current	If	50	mA
	Peak forward current	Ifm	1	A
	Reverse voltage	Vr	6	V
	Power dissipation	P	70	mW
Output	Collector-Emitter voltage	Vceo	60	V
	Emitter-collector voltage	Veco	5.0	V
	Collector current	Ic	50	mA
	Collector power dissipation	Pc	150	mW
Total power dissipation		Ptot	170	mW
Isolation voltage 1 minute		Viso	3750	Vrms
Operating temperature		Topr	-30 to +100	°C
Storage temperature		Tstg	-40 to +125	°C
Soldering temperature 10 seconds		Tsol	260	°C

• Electrical / Optical Characteristics

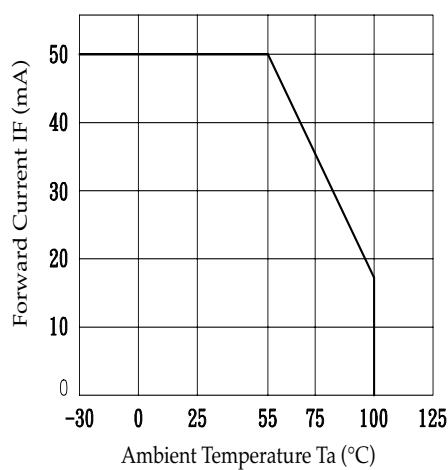

(Ta = 25 °C)

Parameter		Symbol	Conditions	MIN.	TYP.	MAX.	Unit
Input	Forward voltage	Vf	If=20mA	-	1.2	1.4	V
	Reverse voltage	Ir	Vr=4V	-	-	10	µA
	Terminal capacitance	Ct	V=0, f=1kHz	-	30	250	pF
Output	Collector dark current	Iceo	Vce=200V, If=0	-	-	0.1	µA
	Collector-emitter breakdown voltage	BVceo	Ic=0.1mA, If=0	60	-	-	V
	Emitter-collector breakdown voltage	BVeco	Ic=100µA, If=0	5	-	-	V
CTR%	NO GRADE	CTR	If=5mA, Vce=5V	50	-	600	%
	GRADE : A	CTR	If=5mA, Vce=5V	100	-	600	%
Transfer Characteristics	Collector-emitter saturation voltage	Vce(sat)	If=20mA, Ic=1mA	-	0.1	0.3	V
	Isolation resistance	Riso	DC500, 40to60%RH	5e10	10e11	-	Ohm
	Floating capacitance	Cf-	0.6 V=0, f=1MHz	-	0.6	1.0	pF
	Response time (rise)	Tr	Vcc=2V, Ic=20mA	-	5	20	µs
	Response time (fall)	Tf	Rl=100Ohm	-	4	20	µs

REELING INFORMATION

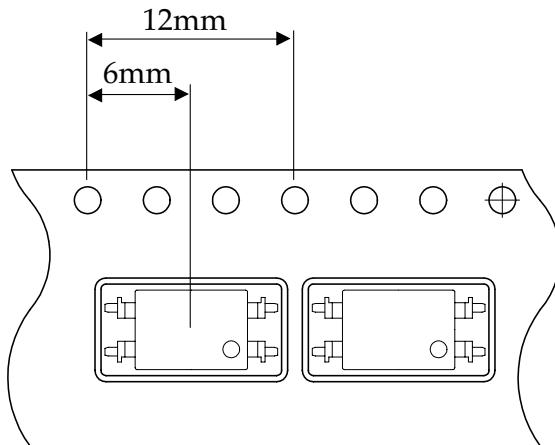

The AMC181 High Voltage Opto Coupler is available in either bulk or reeled format.

The standard reel size is 2,000 components per reel, and both left hand and right hand reel formats are available.

The difference between Left and Right hand reels is illustrated below :
