HCET-A / TB02 Thermal Switch

contactor use silver material

use imported chip,
keep working time and protected temperature

keep long life

imported **NGK bealloy string chip** ,
let product long life

10mm micro size

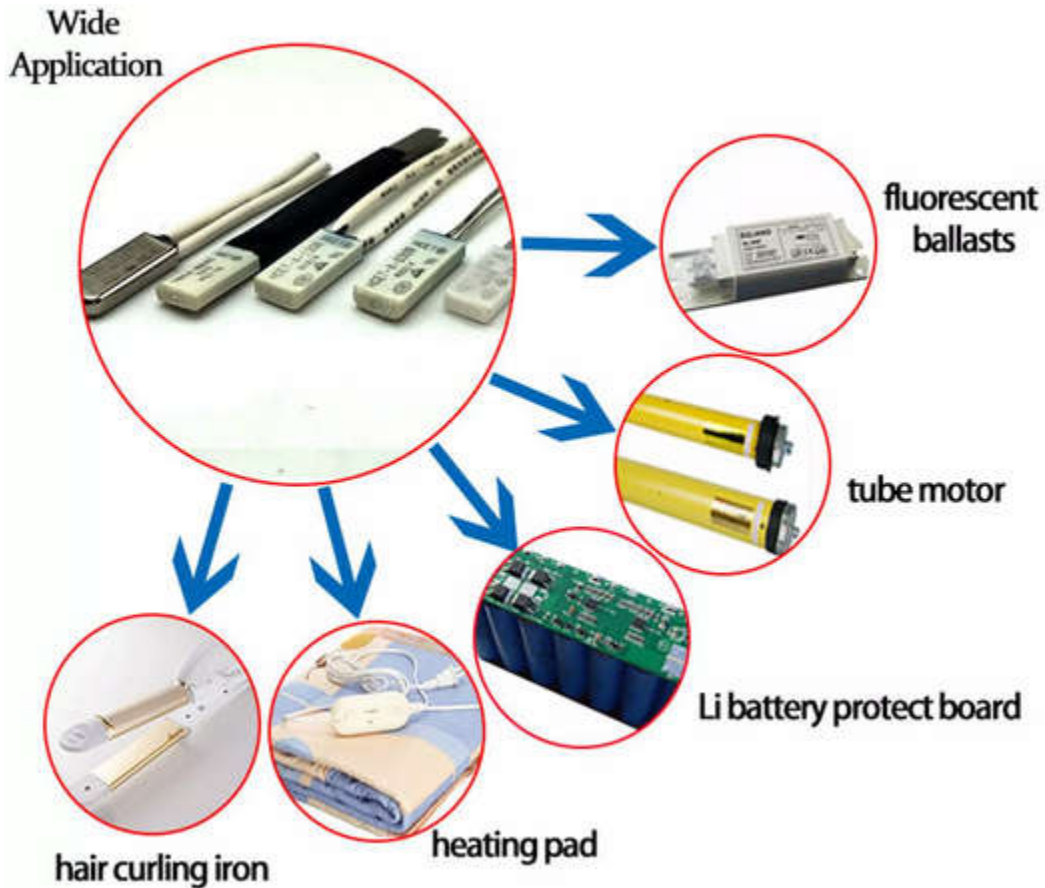

Metal Shell for choice:

**variety of ends for choice follow your products,
widely usage.**

HCET-A/TB02 Series Thermostat

HCET-A/TB02 series is a precise protector with small size. It is sensitive, accurate and reliable, especially suitable for heat cable, battery protection board, micro-motor and security protection of transformer. The patent number: ZL2013 20699495.2

Special Features:

Small size, Installation is more flexible and convenient;

Have the stable work characteristics and excellent reliability;

Sensitive temperature and snap action;

Nickel and wires are optional;

Each type of parts strictly implemented European ROHS environmental standards;

Terminals are optional with normally closed Model B and normally open Model K

Electrical Characteristics:

2.5A/250 V AC

5A/120 V AC

10A/12 V AC

5A/24 V AC

Technical Parameters:

Action temperature from 30°C-155°C, Every 5 °C a specification. Temperature is optional and customized.

Temperature tolerance:±3°C,±5°C.

Main Applications are as follows:

Battery pack, Li battery protect board

Electrical tools

PC board, temperature sensitive cable

Heating-pads, electrical blankets

Fluorescent ballasts and lightings, transformers
