

In a nutshell, the program allows the end user to create professional looking schematics quickly and easily. It's way beyond utilizing scratch written notations.

If you're a field technician who needs to transform some chicken scratch on note paper into a professional looking printed schematic - this is the program you'll want to try.

It comes equipped with NEMA (real NEMA), IEC and electronic symbol libraries. We also offer the end user the ability to create their own symbols as well.

We've designed EZ Schematics to be as self explanatory as possible, but we also offer 100% free technical support. If you've got a question, we've got the answer.

Below, is an illustration of the software interface. The program symbols (embedded and included with the software) are available on the left side of the drawing area and the symbols you create are visible to the right.

Some of our very satisfied customers include:

Advanced Urethane Technologies

American Mfg

Aquion PTY Ltd

Avery Dennison

Bourgault Industries Ltd

Central Arkansas Water

Clear Fork Valley Electric

Corey Compressor

Genpak

Halliburton
