

## DPL Toolkit V3.3.1 - Extras Folder

---

The contents of this folder are:

DataShts : A selection of datasheets for the range of Software and System products offered by Control Techniques.

EDS\_Gen : Custom EDS generator program for DeviceNet. Refer to the User Guide for details.

HlpFiles : Various Windows Help files including the complete Unidrive parameter and option module reference.

Manuals : Product manuals for the UD70/MD29 options as well as the range of high speed communication options.

ProfiGSD : Profibus-DP GSD configuration files for PLC configuration.

ProfiFB : Function Block for Siemens S7 PLC for Profibus-DP non-cyclic communications. Refer to the PDF file for details on implementation.

Present : A selection of training and sales presentations for some of the Control Techniques Software and System products.

PPView97 : Microsoft Powerpoint 97 Viewer. This is the licence free viewer that can be used to view the presentations in the Present directory.

SSaver : Some Control Techniques Screen Savers for Windows 95 only.

## Acrobat Documents

---

All documentation provided on this CD-ROM is in Adobe Acrobat PDF format (version 3). The free viewer for these files is located in the ACROBAT directory on the root of this CD-ROM.
