

Communications

See where it all started. Find out about ZiLOG's famous Z80-based microprocessors: the processor that revolutionized the industry. Also, see the future of our new and existing line of Embedded Modems, Serial Communication Controllers and Digital Signal Processors. Just as many engineers trusted our Z80 for the majority of their applications, you too can trust ZiLOG to fulfill any of your communication-based needs.

Home Entertainment

Whether you're manufacturing a television chassis with Violence Blocking capabilities or an IR remote control for VCR's and audio systems, ZiLOG's Home Entertainment Division designs and develops products ideally suited for any type of home entertainment system. Using the newest and hottest technologies, ZiLOG has partnered with industry leaders to provide quality products at attractive prices.

Integrated Controls

Branching from the success of the Z80, the Integrated Controls Division specializes in Z8, Z8Plus, and spread spectrum microcontrollers. These microcontrollers power a variety of consumer-oriented applications including PC Peripherals, Home Appliances, Spread Spectrum Phones and personal electronics. Complementing each of these applications is a wide selection of One-Time-Programmable (OTP's) devices to aid any designer in their development. Navigate [here](#) to learn more about this and the incredible \$99 Z8 emulator deal!

Company Information / ZiLOG, Inc.
