# CJMCU-204 USB 2.0 HUB 4-Port USB High Speed Controller Module For Arduino

Introduction:

1. Operating Voltage:DC 5V
2. Single Interface Output Current:500mA (max)

Features:

1. Adopt The 2nd Generation USB HUB Controller
2. Can Directly Connect With Computer:no need any external power
3. PC Automatic Recognition Installation:no need driving program
4. Built-In Current Overload Short Circuit Protection Device
5. Support USB2.0:speed can up to 480Mbps,downward compatible witht USB1.1
6. System Support for Win95/98/Me/2000/XP.Linux2.4 and Macos8.5 or higher versions
