

## 3V 650nm 5mW Line Laser Diode Module

### 650nm 5mW Focusable Red Line Laser Module Generator Diode

#### **Description:**

Spot mode: line(Continuous output)  
Dimensions: diameter 9mm x length 23mm  
Laser working life: 5000-10000 hours or more  
Laser wavelength: 650nm  
Output power: 5mW  
Operating voltage: DC3V  
Working current: 16mA ~ 20mA  
Working temperature: -36 °C ~ 65 °C  
Storage temperature: -36 °C ~ 65 °C  
Level: sub-industrial grade  
Color: red light  
Material: brass

#### **Application:**

(1) industrial grade: can be used for equipment, health care, military, Kam pseudo security, stage lighting, tools, U disk, mobile phone, projection teaching flip pen, warm measuring (ranging) instrument, sweep instrument, marking instrument, level, indoor and outdoor decoration and other products;  
(2) sub-industrial level: can be used for beauty equipment, health equipment, gifts, consumer Category products, industrial grade alternative products;

#### **Package included:**

1 x 3V 650nm 5mW Line Laser Diode Module
