### hps BOARDLine

Training systems for vocational and advanced training in:

- Fundamentals of
- Electrical engineering /
  - Electronics
  - Installation technology
  - Contactor control
  - Drive engineering
  - Control engineering
  - Power electronics
  - Automation
  - Mechatronics
  - Communications

### hps MEDIA Line

High-quality software packages for the innovative PC-based learning from vocational training up to academic education

### hps LABLine

Low-price experimenting panels for a first approach to electrical engineering / electronics, digital and analog technology, with interface for PC-based measuring
