

**MSP675**  
**(3" with 7" Leads)**

**Magnetic Speed Sensors**

GAC's Magnetic Speed Sensors are a rugged and economic solution for detecting engine speed. Sturdier than plastic sensors and outperforming semiconductor-type devices at high temperatures, GAC's epoxy encapsulated sensors are unaffected by dust and dirt. Multiple sizes and customized configurations are available.

**Features**

-65°F to +255°F (-54°C to +107°C) Operating Temperature

---

Available for Hazardous Location Installation (Not Certified)

---

Produces Electrical Frequency

---

Requires No Energizing Circuit From Control

---

Used On All GAC's Electronic Speed Controllers

---
