

InventorCAM

InventorCAM

InventorCAM is an Integrated CAM for Autodesk® Inventor® and it revolutionizes CNC milling with its unique iMachining technology - saving 70% and more in machining time and dramatically extending the cutting tools life.

InventorCAM is seamlessly integrated in Inventor and has full toolpath associativity to the Inventor model. The tight integration with Inventor streamlines the design-to-production life cycle.

The InventorCAM iMachining technology provides immense savings and increased efficiency in your CNC milling operations. The patented iMachining is completely unique both in its toolpath and its Technology Wizard that automatically calculates the optimal cutting conditions, taking into account the toolpath, stock and tool material and machine specifications.

InventorCAM offers a free full version 30-day trial. Download and experience the benefits of the powerful InventorCAM solution. Watch the InventorCAM Professor videos as you evaluate the InventorCAM functions.

Benefits

- Saves 70% and more in machining time and dramatically extends the cutting tools life
- Seamlessly integrated in Inventor, with full toolpath associativity to the Inventor model
- Supports all CNC applications, including iMachining 2D, iMachining 3D, 2.5D Mill, 3D Mill/HSM, Indexial and Sim. 4/5 axes Milling, Turning and advanced Mill-Turn for Multi-Turret and Multi-Spindle CNC machines.
