Product description

5.5x2.1mm Male 12V DC Power Socket Jack Plug Connector Cable for Security Camera

Designed for CCD Cameras or Wireless cameras, Led Driver, Strip connector.
* You may connect extra Battery packs with this cable or use it for CCD Camera installation.
* Male Power Ends DC Cord w/ Male Plug 18AWG / 2 Wire, 12inch = 1ft Red(Positive) / Black(Negative) DC male 5.5mm x 2.1mm plug.
* Most dome-style or bullet-style surveillance cameras come with a short power cable but need a patch cable to connect to a power supply.
* Connect your camera to the power supply easily with the Male DC Power Pigtail, which has one feet of red and black color-coded wires along with a standard center-positive plug to connect easily to your camera.
* This is also a perfect usage for connecting Binky CCTV cables to your power distribution system. With it's high quality two stripped tinned wires, there is no need to worry about it's quality and durability.
