

PCB Print Circuit Board Carbide Micro Drill

Feature:

- 100% Brand new and high quality.
- micro drill bits 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, 1.0, 1.1, 1.2mm (one piece for each size)
- Shank Diameter: approx.0.125" (3.175MM)
- Material: hard alloy

Product description

Feature:

100% Brand new and high quality.

10 pcs micro drill bits 0.3, 0.4, 0.5, 0.6, 0.7, 0.8, 0.9, 1.0, 1.1, 1.2mm (one piece for each size)

Shank Diameter: approx.0.125" (3.175MM)

Material: hard alloy

Please allow little size error due to hand measurement.

Have large chip removal space, small resistance during chip removal process.

Use high quality materials and fine grinding process makes sharp cutting edge, reduce cutting force and breaking drill, improve the quality of hole wall. Strictly symmetrical cutting edge makes for high performance cutting and avoids drilling deviation.

Package Included:

10 X Drill Bits
