

IR Receiver Module Wireless Remote Control Kit for Arduino

Description:

- Color: Black
- Remote controller has 21 buttons numbers
- Transmission Frequency: 38KHz;
- Launch Distance: More than 8m (It depends on the surrounding environment, the sensitivity of receiver and other factors)
- Effective Angle: 60 degrees
- Sticking Material: 0.125mmPET, the valid life is 20,000 times
- Static Current: 3~5uA, Dynamic Current: 3~5mA
- Remote controller powered by 1 x CR2025 cell (included)
- Package includes:
 - 1 x Remote controller
 - 1 x IR receiver module
 - 1 x LED light
 - 1 x Cable (28cm/will ship in random color)
