

## UV Lamp for Water Treatment only

### Description :

This type of germicidal uvc lamp is completely put into water to kill bacteria in water,..

The lamp emits a large amount of UV at 253.7nm, which have excellent germicidal effect . These lamps have similar structure and electrical characteristics with those general fluorescent lamps used for illumination . These lamps use ultraviolet glass, which effectively transfer UV at 253.7nm. We can provide different specs, shapes and UV output so you can select the appropriate one according to your purpose .

The complete set includes UV lamp, quartz sleeve, sealing connector with wire and plug. And we can also provide compatible electronic ballast according to the UVC lamp.

Also, Customer can make suitable light tube according to sample and size you provide .

Model No.	lamp dimensions (mm)			power (W)	current (mA)	voltage at 50/60Hz (V)	UV [253.7nm]		rated life (h)
	tube diam	length	arc length				output ( $\mu\text{w}/\text{cm}^2$ )	(W)
