Product Description

GRF5020 is a high linearity PA with ultra-low noise figure (NF). The primary tune for this device covers 1.7 to 2.7 GHz and it achieves outstanding P1dB, IP3 and NF over the band. The device can be tuned to deliver outstanding performance over 0.1 GHz. to 6.0 GHz with fractional bandwidths >30%. With a 10.0 Volt supply, the device can deliver broadband OP1dB values >30.0 dBm.

In addition to use as a PA or linear driver, GRF5020 is well suited to demanding first, second or third stage LNA applications requiring high linearity, ruggedness and low NF.

Consult with the GRF applications engineering team for custom tuning/evaluation board data and device s-parameters.
