

SUPERPRO-3000U

Universal programmer, ZIF48 socket, stand-alone on USB port

Description:

The SUPERPRO-3000U is a universal programmer on USB port which can also run in stand-alone mode. It is equipped with a ZIF48 socket allowing you to program over 10,000 device references. It does not require any adapter for all the devices in DIP packages, and for CMS devices it only requires one sort of adapter by package type. It handles low-voltage devices (3.3V, 2.7V and 1.5V) as well. The programmer can also test the pins of the inserted device in order to detect any fault: improper insertion of the device, defective pin, etc... A LCD display screen of 20 x 2 characters as well as a keypad allow to use this programmer in stand-alone mode. This mode enables it, thanks to the addition of an optional classical compact Flash card (of 64, 128 or 256 Mb) inserted in the back of the programmer, to download numerous algorithms in the SUPERPRO-3000U. Therefore, this allows it to operate without a computer in cases when you need to use it away from the office, or just when you want to use the SUPERPRO-3000U as a production programmer to make copies very quickly with the automatic detection of a device's presence to start programming (**5 times faster than when it is connected to a PC**). The software delivered on a CD-ROM runs with Windows 98/ME/NT/2000/XP. Updates of the software and the algorithms are downloadable freely and regularly from the Internet.

Includes:

- A programmer.
- A power pack 85-260VAC / 12 VDC-2A.
- A USB cord (A-B type).
- A CD-ROM software (Windows 98/NT/2000/ME/XP).
- Instructions for use in French and English.

Requires a « Compact Flash » card 64, 128 or 256 Mb to use it in stand-alone mode.

Back view of the programmer.
